

Custom Milled Titanium Abutments – Redefined

Genuine Neoss Connection – We do not utilize third party manufacturers and their scan body locators because we know that precision is absolutely necessary. Before delivering blanks to CMC, Neoss pre-mills the genuine interface to ensure optimal fit.

Each Neoss abutment purchased from Custom Milling Center includes a Neoss Gold Crystaloc Screw. In addition to the competitive price, Neoss custom abutments from CMC qualify for both the CMC and Neoss warranty programs.

Custom Milling Center's flexible business model provides design and fabrication services for both soft tissue models and STL files. For more information, please call 800-711-0196, or visit us at Custom-Milling.com.

**Custom Milling Center now offers exclusive
Neoss custom milled titanium abutments.
